announcements

Updated pricing from [Audix](#) and mic finder [here](#).

New [Firmware](#) for Audia & Nexia

New Azden [FMX-42a](#) Mixer

MixWizard 3:16:2 [Rebate](#)

TV One announces the release of the new [CORIOview C2-6104A](#) 4-Window Video Processor that now accepts COMPOSITE VIDEO as a new selection in addition to component video, RGB and DVI inputs to place up to four sizeable windows on a single DVI output, with each window powered by a separate CORIO@2 scaling engine providing full picture-in-picture flexibility.

This new Multiviewer from TV One has five DVI-U inputs which are the same as a DVI-I connection with the additional flexibility of accepting composite video signals using a BNC to DVI adapter. Like all products in the CORIOview range of Multiviewers, the fifth input is available for use as a background to the four windows or as a cascade input from another CORIOview product, thus adding four more windows per unit.

Colored borders and source labeling are provided for each window and 50 user defined presets (controllable directly from the front panel as well as external communications) allows for the quick recall of customized settings for various applications. Non-volatile memory ensures that all settings stored by the user are retained even when the power is switched off. Four Still Image Stores are built into the C2-6104A which can display one of ten user loadable images, stored in Flash Memory, in place of an input.

The Attero Tech SquawkBox CobraNet Audio Interface is a cost-effective desktop audio product designed to allow a user to easily monitor multiple channels of audio on a CobraNetbased AV system. Up to 16 channels can be monitored using either the internal speaker or with headphones. A 17th "override" channel can be initiated externally for system wide announcements. The SquawkBox can be powered by either PoE or by a DC adapter.

Applications

Join Our Mailing List!

Convenient, desktop audio interface for:

- State and Federal legislative complexes
- Courtrooms
- Central monitoring facilities
- Convention centers

Features

- 16 channels of CobraNet audio can be monitored
- A 17th channel can be set up as an override channel. A simple network message forces the SquawkBox to connect to the override channel to facilitate system wide messages
- Simple setup using any web browser
- LCD display shows the name of each audio stream
- Adjustable volume and simple channel selection
- Internal speaker or rear panel 3.5mm headphone jack for private monitoring
- PoE powered from a standard PoE network switch, or from a DC adapter
- Desktop or wall mount

Enclosure size is 7.50"W x 1.75"H x 5.0"D
